

Replication material for EEREV-D-20-00462R2
Online Platform Price Parity Clauses: Evidence from the EU Booking.com case
Andrea Mantovani; Claudio A Piga; Carlo Reggiani

List of files:

- replication_code.do
- data_prices_2015.dta
- data_airports.dta
- data_google_trends.dta
- data_town_avail.dta
- data_mac_sr.dta
- data_mac_antic.dta
- data_mac_antic_all.dta
- data_mac_synth.dta
- data_mac_mr.dta
- data_mr_placebo.dta
- data_sr_ita.dta

Instruction for replication and files description:

- The file “replication_code.do” contains all the commands that replicate the Tables and the Figures of the manuscript. The file was written and the analysis was performed using STATA16. The file can be executed all at once or selecting parts of it. The file is commented to help the replication of the Tables and the Figures.
- The file data_price_2015.dta is a data file. The data are used to create Figure 2a.
- The file data_airports.dta is a data file. The data are used to create Figure 2b.
- The file data_google_trends.dta is a data file. The data are used to create Figure 3a.
- The file data_town_avail.dta is a data file. The data are used to create Figure 3b.
- The file data_mac_sr.dta is a data file. The data are used to create Table 2, Table 3, Figure 4, Figures A.1, A.2, A.3 and A.4, Table B.1, Table C.1, Table E.1, Table E.2.
- The file data_mac_antic.dta is a data file. The data are used to create Table D.1.
- The file data_mac_antic_all.dta is a data file. The data are used to create Table 4.
- The file data_mac_synth.dta is a data file. The data are used to create Figures 5a and 5b.
- The file data_mac_mr.dta is a data file. The data are used to create Table 6, Figure G.1 and Table H.1.
- The file data_mr_placebo.dta is a data file. The data are used to create Table 7.
- The file data_sr_ita.dta is a data file. The data are used to create Table F.1.
